New Customer Considerations Regarding In-Suite Cabling

1. Is there any existing cabling in the offices at present?
2. Can and will any of the existing cabling be used?
3. Is existing cabling Cat5e or Cat6 cabling?
4. How many cables to each station and what are their exact location for all offices, cubicles, printers, copiers, open space areas and any counter-top areas that need voice and data cabling?
5. Is there a service feed cable from the floor's riser closet into the suite at present?
6. Is there a Plywood backboard existing or does one need to be installed?
7. Are there wall-mounted patch panels with rack or floor-mounted data rack?
8. What is the existing cable management for rack?
9. What is the color preference for voice and data wall plates and jacks?
10. What are the quantity and lengths of Patch Cords?

One Eleven Congress

11. Are there any cubicles in open areas?
12. Are the voice cables going to be terminated on Patch Panels or on the backboard on phone blocks?
13. Do you have a phone switch or are you using a VOIP system?
14. Will there be any locations throughout the suite that require cabling for WI-FI capability?
15. What type of services are you bringing into the new suite?
16. Who is your service provider?
17. Who is your General Contractor?
18. What is your anticipated move in date?
19. What is your company name, service & billing address, suite number, office contact's name, phone number and email address?
